ELECTION WITH TRAVERSE

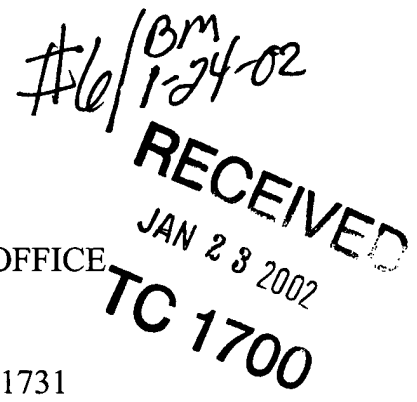

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Sir:

In response to the Examiner's restriction requirement of December 18, 2001, the time set for response being one month from the mailing date from the U.S. Patent and Trademark Office, i.e., January 18, 2002, Applicant hereby elects the invention of Group I, including claims 1 - 163. The above election is made with traverse for the reasons set herein below:

In the Official Action of December 18, 2001, the Examiner indicated that all claims (1 - 28) were subject to restriction under 35 U.S.C. § 121. The Examiner restricted the claimed invention into Group I, including 1 - 16, drawn to a process for dispersing paper, classified in Class 162, subclass 57; into Group II, including claims 17 - 28, drawn to an apparatus for dispersing paper stock, classified in Class 162, subclass 261.

The Examiner asserted that the inventions were related as process and apparatus for its practice, and that the inventions are distinct from each other under M.P.E.P. § 806.05(e)

because the "process of Group I does not require 'a worm extruder' as required by the apparatus of Group II and can be fed to the distribution device with a high consistency pump."

Applicant respectfully submits that the Examiner has omitted one of the two criteria for a proper restriction requirement now established by the U.S. Patent and Trademark Office policy. That is, as set forth in M.P.E.P. § 803, "an appropriate explanation" must be advanced by the Examiner as to the existence of a "serious burden" if the restriction requirement were not required.

While the Examiner has alleged a possible distinction between the two identified groups of invention, the Examiner has not shown that a concurrent examination of these groups would present a "serious burden" on the Examiner. In fact, while the Examiner has noted that the individual groups would be classified in different classes, there is no appropriate statement that the search areas required to examine the invention of group I would not overlap into the search areas for examining the invention of group II, and vice versa. Applicant respectfully submits that the search for the combination of features recited in the claims of the above-noted groups, if not totally co-extensive, would appear to have a very substantial degree of overlap.

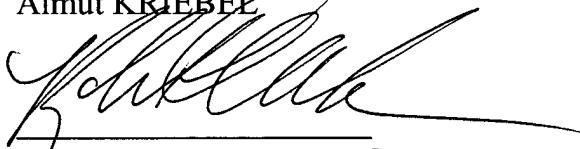

Because the search for each group of invention is substantially the same, Applicant submits that no undue or serious burden would be presented in concurrently examining

Groups I and II. Thus, for the above-noted reasons, and consistent with the office policy set forth above in M.P.E.P. § 803, Applicant respectfully requests that the Examiner reconsider and withdraw the restriction requirement in this application.

For all of the above reasons, the Examiner's restriction is believed to be improper. Nevertheless, Applicant has elected, with traverse, the invention defined by Group I, in the event that the Examiner chooses not to reconsider and withdraw the restriction requirement.

Should the Examiner have any questions or comments, he is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,
Almut KRIEBEL
